I am an experienced ASIC design engineer (Backend) with more than 15 years of experience, and a power engineer with more than 5 years of experience. I enjoy taking ownership of challenging problems and I am skilled at working in a team from synthesis to tape-in, and in power reduction tools and flows.

Work History

- 1995 – Current **VLSI Test Engineer – Software Engineer – Power Engineer - Physical Design Engineer -**
Matam Haifa
Working in two large Hi-tech companies
- 1994 – 1995 **Automation Engineer** - *Power station Maor David - Hadera*
The power station changed its name to Orot Rabin
- 1994 **Alya to Israel** - *Arad then Netanya*
- Later I went to live in Haifa and finally to Binyamina
- 1978 – 1994 **Belgian Railways** - *Brussels Belgium*
- First technician, then technician team leader (27 technicians) then (after finishing my studies) engineer.

Education

- 1987 – 1991 **Engineer (MSc) in Computer and Management**
Faculté Polytechnique de Mons – Mons Belgium
- 1985 – 1986 **Engineer (MSc) in Electrical and Electronics Engineering**
Institut Supérieur Industriel de Bruxelles – Brussels Belgium
- 1980 – 1985 **Engineer in Electronics Technology**
Ecole Technique Supérieure de L'Etat – Brussels Belgium

Skills

Tool usage: Synopsys fc_shell, and PrimeTime, Mentor Calibre, Cadence genus/innovus (basic)
Languages: French, Hebrew, English, Dutch, notions of Arabic
Good knowledge of TCL, Python, C/C++, Verilog
